**DISTRIBUTED GENERATION
- APPLICATION FOR INTERCONNECTION -**

This application must be completed and returned to the Cooperative to initiate project evaluation. The information will be used by the Cooperative to determine the required equipment configuration for the member interface. Every effort should be made to supply as much information as possible. See Distributed Generation Interconnection Requirements document for additional information.

ESTIMATED LOAD, GENERATOR RATING AND MODE OF OPERATION INFORMATION

The following information will be used to help properly design the interconnection. This information is not intended as a commitment or contract for billing purposes.

Residential _____ Commercial _____ Industrial _____

Total Site Load _____ (kW)

Generator Rating _____ (kW) Annual Estimated Generation _____ (kWh)

Mode of Operation: Isolated _____ Paralleling _____

DESCRIPTION OF PROPOSED INSTALLATION AND OPERATION

Give a general description of the proposed installation, including a detailed description of its planned location and when you plan to operate the generator (attach additional page if necessary).

ADDITIONAL INFORMATION

In addition to the items listed above, please attach a detailed one-line diagram of the proposed facility, all applicable elementary diagrams, major equipment, (generators, transformers, inverters, circuit breakers, protective relays, etc.) specifications, test reports, etc., and any other applicable drawings or documents necessary for the proper design of the interconnection. Also describe the project’s planned operating mode (e.g., combined heat and power, peak shaving, etc.), and its address or grid coordinates.

SIGN OFF AREA

Member agrees to provide the Cooperative with any additional information required to complete the interconnection and to operate the equipment within the guidelines set forth by the Cooperative. Member acknowledges that he/she has received the co-op’s DG informational packet, is responsible for all costs which KREMC incurs as a direct or indirect result of the project (metering, etc.), and is responsible for securing and maintaining liability insurance (\$1 million) on the generator.
