

Geo's Safety Tips

1. Always roll up your car's windows if you're on the road during a storm and see lightning.
2. Never use a cord that is frayed or ripped. Plugging a damaged cord into an outlet can start fires!
3. Did you get your toast stuck in the toaster? Make sure to unplug your toaster before using a fork or knife to get your toast out!
4. If you see fallen power lines, don't go near them. Tell an adult immediately so they can report them to KREMC.
5. It's fun to go swimming, but if the sky gets dark or you hear thunder, get out of the water immediately and move far away from it.
6. Make sure your hands are dry before turning on a switch or touching an electrical outlet.
